

Hey FCC,

Please don't dump title II net neutrality protection. The internet and net neutrality are vital to our lives and economy. The internet doesn't need fast and slow lanes or preferential treatment to some content version others. It needs to be protected. The best internet, the internet that started Google, Facebook, WhatsApp, Instagram, Twitter, Netflix, etc, is one that is neutral and allows startups like these to exist. Without net neutrality many if not all of these companies wouldn't exist and we would probably be looking at the Comcast, AT&T, Charter, Verizon, likely sub par equivalent. I implore you to keep title II.

Sincerely,

Colin Prothero
